Local and General

Mr. and Mrs. James Greaves are receiving congratulations on the birth of a daughter recently.

Painting operations on the Savoy hotel are under way and the continued wet weather is hampering operations.

Lieut. J. D. Henderson is spending the two weeks beginning on Monday in camp at Sarcee, where the militia is in training. Dr. Heal is also at the camp.

The Ladies' Aid will meet at the home of Mrs. J. D. McDougall on Thursday, July 26th. All members are requested to make a special effort to attend this meeting.

Rev. F. A. Densmore will attend the district synod of the Lutheran church which takes place in Edmonton and in consequence there will be no Lutheran service until August 12th.

Joe Bennett has decided to open a billiard parlour and barber shop at Travers. This east country is coming back to its old time prominence very fast and should prove a very satisfactory location for any line of business.

Mr. and Mrs. M. G. Clever, of Calgary, en route for Yellowstone National Park, were detained here for some days owing to the condition of the roads to the south, where very heavy rains had occurred making the roads almost impassable.

Hunziger Bros. have given an order for a John Deere combine, complete with platform and pickup, swather and transport truck, to R. Tyler. This is the only machine of this kind available for this district this year, the production having been away below the demand.

The list of tourists on the road from Champion is so extensive this year that any effort to record them individually would have been a task involving such a major proportion of the names of residents in this vicinity that it was given up as a useless job early in the game. The itinerary involved includes almost every corner of the continent.

While there has been half not so many miles away from Champion, so far this particular section has escaped without damage from this source. It is gratifying, too, to note that but a small area has so far suffered in this respect. The present crop is of satisfactory in prospects that it is to be hoped immunity from hail damage will continue.

Prof. Gladstone, Europe's master mind reader, will be in Champion shortly. The professor will answer any questions put to him as everyone should have a real question prepared before going to the show. The Chronicle would like to know just who the amateur crackman (or crackmen) who made the effort to put all the safes in town out of business.

The new sidewalk just completed on the north side of main street has made a decidedly favorable change both in appearance and utility, as compared with the one removed. Everyone is delighted with the various carpenter improvements completed here under way, although it is some times hard to reconcile this pride in contemplating one's tax statement. However, real improvements are well worth paying for.

Total shipments of wheat from Champion for the crop year of 1927 have now exceeded the half million mark, the figure of 1,552,745 bushels having been reached on Monday. Of other grains 57,220 bushels had been shipped on the same date, making a grand total of 1,609,965 bushels of all grains. There is still some wheat in farmers' hands and in the elevators so that the final figures will be fully up to if not exceeding expectations.

Of all the individuals who took in the fair it was very evident but few took in the agricultural exhibits, but everyone knew all about the horse racing and stampee events. There is no doubt we turn out a very sporty crowd from Champion and district.

G. A. Orr, the local postmaster, and his family, left last week for their annual holiday motor trip, California being their objective this year. Mrs. Hill is in charge of the postoffice.

22 CARS PILE UP IN WRECK ON C. P. R.

Moose Jaw, July 11.—Twenty-two freight cars laden with grain, lumber and coal are piled in a heap and between 150 and 200 feet of wreckage on the C. P. R. track about half a mile west of C. P. station as the result of an accident that occurred at 1:15 this morning. The freight was travelling eastward toward Moose Jaw when a something (Continued on page 2).

Lonheim-Ferguson

On Wednesday July 18th, a pretty wedding was held at the home of Mr. and Mrs. Adam Ferguson, when their daughter Esther Luella became the bride of Roy H. Lonheim of Lethbridge. The ceremony was performed by Rev. Brunton of Vulcan.

The bride marched on the arm of her father, followed by the brides maid and best man. Miss Mattie McFadden, of Coaldale, played the wedding March.

The bride made a charming picture in her bridal dress of white georgette and satin trimmed in silver lace; her veil held in cape effect was crossed in front and held at each side by pearl ornaments. The beautiful bridal bouquet were of red opelia roses and baby breath.

Miss Marjorie Ferguson, sister of the bride made a pretty brides maid in a dress of rose georgette trimmed with lace and carried a bouquet of pale pink carnation roses and baby breath.

Henry Ferguson brother of the bride acted as best man. After the ceremony lunch was served. The brides cake was a four tier cake decorated with silver bell and flowers.

Mr. and Mrs. Lonheim left on the evening train for Calgary and Banff where the wedding trip will be spent. Mrs. Lonheim travelled in a second ensemble suit and blonde shoes, a blue and sand hat tinted with hand painted flowers completed this pretty costume.

The guests were: Rev. Brunton, Vulcan; Mr. and Mrs. Adam Ferguson, Vulcan; Victor Ferguson, Henry Ferguson, Marjorie Ferguson, Miss Mattie McFadden, Coaldale; Mr. and Mrs. Harry Hagg, Dr. and Mrs. Frank Collier, Mr. and Mrs. P. Larkin, Mr. and Mrs. A. Warner, Reid Hill; Lela Philpott, Thelma Williamson, Olive Larkins, Kathleen Kowell, Mr. and Mrs. Geo. Jordan, Mr. and Mrs. Mark Math, Benoit, Blom, Lethbridge; Lovera McKay, Reid Hill; Margaret Carlson, Mrs. Robert Ferguson, Vulcan; Mr. and Mrs. Jas. Buddle, Lomond; Norman Carlson, Harry Mallock, Maslin Mallock, Mr. and Mrs. Gordon McKay, Reid Hill; Mr. and Mrs. Neil McLeod, Mr. and Mrs. Otto Hagg, Mrs. E. Nyler, Laura Ferguson, Vulcan; Harry Ferguson, Vulcan; Fern Bond, Mr. and Mrs. Wagnenburgh, Ed. Larkins, Howard and Laura Hagg, Lawrence Kavanagh, Frisco, Calif.; Edwin Philpott. The wedding gifts were wonderful in quantity, quality and usefulness.

OBITUARY

Died—On Tuesday morning, Mrs. Mary Granlin, aged 82 years. The deceased has resided with her son-in-law, J. Magnusson, in the Lethbridge district since coming to this country in 1900. She was predeceased by her husband, who died in 1908. Surviving relatives include four sons and one daughter—C. J. Granlin of Staveland, Albert of Vulcan, Melvin and Ingvald of Champion and Mrs. J. Magnusson of Lomond. The family have the sympathy of the community in their bereavement.

Mrs. L. J. Howe, of Amarillo, Texas, is visiting her daughter, Mrs. Frank Caldwell.

Frank Caldwell was a member of the Vulcan band which won first prize at the Calgary exhibition.

Mrs. E. Latiff wishes to thank the ladies of the Royal Purple for their kindness in donating recent illness and for the beautiful plant given her.

WILL PROBE ITALIA CRASH—HOME GOVERNMENT EXPECTED TO ARRANGE FOR FULL INQUIRY

Rome, July 18.—That there will be a full inquiry into the causes of the disaster to General Umberto's polar dirigible, the Italia, is taken for granted in official circles here. It was stated that this inquiry will be conducted as soon as practicable and that an early and full investigation would be to the general's own interest.

The report in the Stockholm newspaper Dn Postet that General Noble is held on the base ship Citta Di Milano as virtually a captive of the Italian government is scoffed here. Intimations in Russian newspapers that the leader of the expedition abandoned his men is treated here as a piece of scurrilous libel.

To both these accusations the point is made that the general is still too ill to be moved.

Under the heading, "Defamation Against Italy," Giornale D'Italia discusses charges that Captains Mariano and Zappi abandoned Dr. Malmgren and says the version which they have given of his fate cannot and should not be the object of any discussion.

THURSDAY, July 19, 1928

NOTES AND COMMENT.

While the weather has been for the greater part wet and cool to promote rapid development of the wheat fields towards maturity very gratifying progress has been made during the past week. Hard fields are now in the majority and some very beautiful stands are to be seen in all parts of the district. Some established grain is very uneven owing to uneven germination in the spring, but even these hold promise of a fair crop. Up-to-date the grain is further advanced and promises an earlier harvest than last year, with the exception of some late sown fields. There is the largest acreage put in here and it is hoped conditions will be sufficiently satisfactory to equal last year's record of production.

Now that the Women's Institute has definitely decided to accept the invitation to take charge of the community exhibit at the Carmargay fair everyone in the district should keep the fact in view and assist in making the exhibit fully representative of the district. Making this exhibit has a value beyond the capturing of a prize in that it should be an incentive to residents at large to have something which would prove of value as

JOINING THE WHEAT POOL IS GOOD BUSINESS

A Toronto Business Man, Owner of Alberta Farm Land, Says He Would Not Think of Staying Out of the Alberta Wheat Pool.

J. T. Todd, general manager of the J. T. Todd Lumber Company, Toronto, Ontario, is the owner of a large tract of land in the Crowfoot district in Alberta. He is a staunch member of the Alberta Wheat Pool. In fact, so interested is Mr. Todd in the Pool's development that he is endeavoring to persuade non-Pool neighbors to join the organization.

In a recent letter to a neighbor at Crowfoot, Mr. Todd says:

"Dear—
I have often wondered if you had joined the Wheat Pool. If you have not, I believe if you will consider this matter seriously you will find it is much to your interest to be a member of the Pool. As you know the Pool is only the farmer in business for himself, and the more support the Pool has the better it is going to do for all of us. It is simply a cold-blooded proposition so far as we are concerned and we, like everyone else in business, want to get as much for our labor and what we can. This is a day of co-operation and not only the farmers are doing this but the largest industries, such as automobile and steel, are doing the same. The people in the steel and automobile business are considered to be the brainiest in the world and they are only following the lead which the farmers have pointed out to them during the last five years. Stores are also doing the same.

"I believe if you will consider this matter from your own best interest and the best interests of the community and farmers in large you will decide that YOU CANNOT AFFORD NOT TO BE A POOL MEMBER. I would not think of being out of the Pool myself and I just purchased 200 more acres of land this spring, and as you know, 200 acres of that is now broken and will be in crop next year. All of my land is in the Pool, and in fact, if I had ten times as much land as I have it could be handled in no other way than through the Pool.

"I would like to see you and all the other fellows in the Crowfoot district members of the Pool. If enough would come in we could have an elevator at Crowfoot and that is what we want in time. I believe that with the way the movement is growing we will eventually have it."

part of such an exhibit this year or in future military camps. Mr. Cook will be remembered as a very popular pastor of the United Church here a few years ago, and his activities will be of interest to many friends here. C. H. Sutton has purchased a Fiat Frost & Wood mowder from R. Tyler, which he considers is the last word in a mowing outfit.

Between the Calgary Stampede and touring parties the town and district were almost denuded of population last week.

During the week of July 1 to 8 a new feature of social hygiene work in the province was established by F. T. Cook, lecturer for the provincial Department of Health, who conducted a series of lectures and moving pictures at Sarcee military camp.

The military authorities co-operated in the work to the extent of providing places for the meetings and lending their moral support to the movement with the result that the meetings were well attended and it is felt that a great deal of good was accomplished. It is hoped that this work under the direction of the Department of Health may become a regular feature

THE Pontiac emblem, now a familiar sight on every highway, is the distinguishing mark of the world's finest low-priced six.

It identifies the smoothness of Pontiac's Six-cylinder engine, with its new improved G-M-R cylinder-head, the enduring qualities of Pontiac's sturdy chassis, the easy-riding comfort of Pontiac's Lovejoy Shock-Absorbers, the countless refinements of engineering and construction that spell "quality" in a motor-car.

And, just beside the hood of the New Series Pontiac Six is another symbol of a fine automobile, the "Body by Fisher" emblem, with all that it implies of luxury, craftsmanship and stylish beauty. Pontiac is the lowest-priced six which can claim the distinction of "Body by Fisher".

Whenever you see the familiar "Indian Head" emblem, and say "There goes the New Pontiac Six", you are identifying, beyond doubt, the world's finest of low-priced sixes.

Ask your dealer about the G.M.A.C. Deferred Payment Plan which makes buying easy

Noxious Weeds

Your co-operation with Provincial and Municipal authorities is solicited in the control and eradication of weeds. Keep your fields and roadsides free from these unsightly and costly pests.

Weeds reduce the yield and lower the grade of your grain, rob the soil of its fertility and cost money in dockage and transportation. Approximately 6,000 cars were required to haul the screenings from one season's crop in Western Canada to terminal markets. Will you not help to reduce this enormous loss?

Give your local weed inspector and the Provincial Field Supervisor in your district every possible support in dealing with the weed problem.

Field Crops Branch

\$6.75 COAL RATE TO ONTARIO IS FINISHED FOR THIS YEAR

Ottawa, July 16.—(By Canadian

Press) — The three-months test movement of Alberta coal to Ontario under the rate of \$6.75 per ton set by orders-in-council concluded yesterday. The board of railway commissioners has not yet received data covering the movement and is not in a position to state to what extent the reduced rate was taken advantage of by Alberta shippers and Ontario buyers of coal.

The test movement will continue for three years, under the terms of the order-in-council, but it is provided that the railways shall be reimbursed for the cost over and above the \$6.75 rate each year. Consequently the board of railway commissioners will hold sittings, probably in the early autumn, to determine what amount, if any, is due the railways.

An investigation is being conducted by the department of mines to determine the relative value of Alberta and American anthracite, and to determine whether or not the use of the western fuel is feasible.

After the three-year movement, the government, it is expected, will be in a position to decide whether or not Ontario and Quebec can obtain their coal from Alberta in competition with the United States product.

LAKE LOUISE AN IDEAL GLACIAL LAKE

Allan L. Benson, the geologist, collects Lake Louise as an ideal example of a glacial lake in his recently published book, "The Story of Geology."

"Climb high enough," says Mr. Benson, "and one will find glaciers, and often one will discover, far up among the peaks, circular little pockets, a few rods or a few miles in diameter, that glaciers have made by what is known as a 'locking' process—the ice freezes to rocks, picks them up and carries them away year after year until a basin is made. Some of these basins are filled with water and some are not. Whoever has been in the heart of the Canadian Rockies, near Banff, can never forget the exquisite group of glacial lakes that nestle in pockets far up near the crests of the peaks. Lake Louise, the queen of the glacial lakes that nestle in pockets far up near the crests of the peaks, is perhaps one of the most beautiful objects upon which the eye of man ever rested. It is like a gorgeous flashing opal set in peaks that plunge into its edges. Towering back of it and also plunging into its waters is the glacier that

made the lake, standing on guard, one might say, over its beautiful daughter. From June until September the cold relaxes its grip sufficiently to enable travelers to pause in comfort at this beauty spot. During most of the remainder of the year the fringe of the ice age is in charge. Lake Louise is fed by the glacier that towers behind it, and its waters, after leaving it, go racing down the Bow River Valley, which is only a little less beautiful than the lake itself. Tourists are told that part of the waters go to the Atlantic and part to the Pacific, and since the lake is near the continental divide this may be true."

THREE DEAD IN ENGINE EXPLOSION

Winnipeg, July 12.—M. Rogers, engineer; W. Stanbury, fireman, and W. Clay, conductor, all of Revelstoke, B.C., were killed early today when the boiler of a pusher engine of C. P. R. freight train No. 86 exploded near Glacier, B.C.

The freight was proceeding along a steep grade in the Rocky Mountains when the accident occurred. The blast was attributed to water shortage.

The violence of the explosion lifted the boiler high into the air and crashed the steel cylinder up on the center cars, demolishing them to splinters. The caboose and head engine later caught fire, but the flames were kept from spreading by the heroic efforts of Trainman M. Savoie.

The engine crew of the pusher engine was instantly killed by the explosion, but details are still lacking regarding the direct cause of Mr. Clay's death.

Is Vancouver Man
Vancouver, July 12.—Conductor W. Clay, killed in a recent active boiler explosion near Glacier today, is a son of Mr. and Mrs. Edwin Clay, Vancouver. The family came from Halifax, N. S., some years ago. Conductor Clay is survived by his widow at Revelstoke.

VERNON BOOTHER IS ARRESTED

Manville, July 12.—The coroner's jury which sat here last night to investigate "Mad Mrs. Yidwin Clay's" murder of July 9, returned a verdict to the effect that Mrs. Booter, her daughter and two hired men, Gabriel Gornaby and Wazyl Roysak were murdered by some person or persons unknown.

Immediately after the inquest, Vernon Booter, 20-3/4 year-old son of the slain woman, was placed under arrest on a charge of murder. He will be taken to Edmonton on Wednesday afternoon for his preliminary hearing.

The Victoria Tower of the Dominion Parliament Buildings at Ottawa, from which the flying message of the carillon rings forth.

EVERY TWO MINUTES OF EVERY BUSINESS DAY ... SOMEONE IN CANADA BUYS A NEW GENERAL MOTORS CAR

SINCE the days of Confederation, General Motors of Canada Limited has been supplying Canada with transportation. Each year as requirements have multiplied, the scope of General Motors service has widened; the quality of General Motors cars has steadily improved. Each year more Canadians have looked to General Motors for better automobiles, until now, every two minutes of every business day, someone in Canada buys a new General Motors car. These cars are bought by people you

know . . . by people like yourself . . . for the very reasons which would guide you in the choice of a car.

They are bought because they are the product of the most progressive organization in the world's most progressive industry . . . because they reflect the General Motors policy of constant advancement . . . because they are better cars . . .

They represent the latest developments of the world's leading automotive research

laboratory, offering these developments to the public as soon as they become available. They are proved in advance, at the expense of General Motors, not the public. They are better cars because they are Canadian cars. And they embody greater value because of General Motors money-saving methods of quantity buying and volume production.

This popularity of General Motors cars holds more than a passing interest for the Canadian car buyer . . . for General Motors utilizes increased demand to reduce production costs and offer still more outstanding automobile values.

CHAPTER XXVIII.—Continued

The willows that grew beside the river were blushing as the sap rose, green, yellow or red according to their kind—and the roads began to whiten with the fuzz from the aspens.

But, on this twenty-fifth day of April there arose out of the west a sheer black cliff of cloud into the boundless blue—a thick, deep cloud, in which silent lightnings played; and as the day went on, it moved up higher and higher into the sky until at three o'clock it was ready to cover the sun.

During this time the heat had not abated. The air grew heavy and oppressive. It was the sort of a day when horses break into frothy sweat and people feel cross-grained, clammy, irritable, and full of aches and pains which they attribute to the weather.

The edge of the cliff had a whitish color at four o'clock, when the sun had gone under, and all the trees were standing still expectantly, as if biding themselves for something which they were unable to help.

In the gathering gloom the houses in Banerman, grouped around the station, looked more than ever like cats about to spring. The clouds are rolling now, with white lines on their bellies, and there is a distant rumble of thunder, like the roar of a far-away city.

All day the rain clouds threaten and thunder growls, but it is not until night has fallen that the change comes. The clouds that have been sitting like birds of ill omen, humped up on the trees, fly further back into the bush, as if in dread.

On the train coming to Banerman Helmi, very pale, very determined, and with a purpose so far-reaching as does not look at her fellow-passengers, for the fear is on her that they might divine her errand and try to dissuade her from it. She has made a vow of vengeance, and she will keep it. Why should she spare the man who has wronged her so much in her life? There is a burning, torturing pain in her heart that only release can ease, and as she sits at the window looking out into the gathering storm, she glows over the scene. She will come in upon him as he sits at his littered table—the only gray old man, who kept so safely the lying newspaper, guarding it, hoarding it, to her harm. Other things he lost in the confusion and untidiness of his ugly den, but this he treasured safe, and showed it to her Jack—poisoning his mind against her—and now her Jack had gone overseas, angry and bitter—to be killed,—and little Lili, when the fever came on her, had no home when she could be nursed back to life—no home, poor little precious Lili, with

her silky brown hair and soft little caressing lips.

The fever in her breasts when she thought of Lili burned like a house and red hot needles, until the perspiration broke in beads on her face. She would see the color fade from her enemy's face when fear gripped his wicked old heart. She had thought of it often since she saw Jack's face gliding away from her... she would see the color go in patches from his face, and he would beg for mercy when he saw the gleaming barrel of the revolver—beg and whimper and call upon his God.

Wild strains of blood in Helmi's head were urging her to strike and not to spare; and the pain, the horrible drawing, twisting pain around her heart grew more maddening every moment, and in every pang and spasm that tore her was a tongue that cried "Revenge!"

Once Helmi thought of God, when a flare of lightning lit up all the countryside, revealing farm houses gloriously, and bending trees that christened before the evening wind. God! a lot he cared. God was with the magistrate and let him live secure while her Jack went out with a letter helmet to die and little Lili, tested in her fever with no mother to comfort her!

Helmi had ceased to reason and ceased to fight—the only left. The primitive passions were ablaze in her. She had been robbed of her mate and her child. Red murder gleamed in her eyes.

When the train stopped at Banerman the storm was at its height. The wind had the whine of stretched wires to it, and whistled across the deserted platform with a horrible hissing sound. The night wasinky black, but bursts of lightning blinded her eyes, and continuous bellows of thunder, like a hundred fire engines roaring past, shut out every other sound. Helmi knew her way as if by instinct.

In her lightning's flashes the house she sought was easily found. She was breathing now like a person with pneumonia, her nostrils quivering like a wolfhound's when she was hunting prey. The door was open, and Helmi intended to do her work completely. She reached the verandah steps, remembering the one that was broken, and stood at the uncertain window looking in. The man she sought sat at his table with a glass and bottle beside him. A roar of thunder made the bottle tremble on the tin tray and rattled the bricks in his chimney. He started and looked toward the window, though Helmi had made no sound.

Helmi moved a step nearer and stared on the glass. She wanted him to know—to see. She wanted to see the circling fear—he wanted him to beg—plead. He came toward the window, and he must have seen her face, white and awful in the darkness, for he reeled back.

Helmi moved a step nearer and stared on the glass. She wanted him to know—to see. She wanted to see the circling fear—he wanted him to beg—plead. He came toward the window, and he must have seen her face, white and awful in the darkness, for he reeled back.

Helmi moved a step nearer and stared on the glass. She wanted him to know—to see. She wanted to see the circling fear—he wanted him to beg—plead. He came toward the window, and he must have seen her face, white and awful in the darkness, for he reeled back.

In fright with a scream of horror.

Then came a crash—a shuddering, sickening crash—with blinding blue lights that seemed to strike at Helmi's eyes like a thousand furies. There was a sound of crashing lumber and a confusion that flung Helmi to the knees. When she opened her eyes and looked through the window she saw her enemy lying dead on the floor—his face livid, his eyes wide open, full of terror...

When Helmi came to herself she was running through the storm on feet shod with fright—running as if all the fiends of the night were in pursuit, the sky opening and shutting with dazzling lights and blinding darkness; night voices screaming and louder than all, her own heart pounding in her ears.

Sometimes she felt, rising to her feet again; sometimes she felt a sudden blow, as if a crashing tree had struck her as it fell; but always her fear drove her on.

She had no sense of fatigue as she ran on and no plan of flight; but a strange honing instinct led her in the direction of Eagle Mines. Even in her hysteria and frenzy her heart carried her toward the little house where she had been loved and secure.

Then came the rain a furious pelting rain that seemed to fall in drowning sheets of water. Every time the heavens opened with the bursts of thunder another downpour drenched the earth.

Suddenly Helmi was aware that some animal was running beside her, and in a flash of lightning she saw the sable colts, the great dogs, the ghostly white against the blackness of the night.

The fearfulness of something warm and living gave Helmi courage, and falling beside the dog she clapped her arms around it in a sudden panic. The dog's head was turned toward her hot face scorchingly, whimpering softly, and with strange comfort, in its almost human tenderness. Her wet clothes hung on her new like heavy weights. The dog ran on ahead with encouraging barks and Helmi, following, begged the dog not to leave her alone in the darkness.

A great weariness came over Helmi now, and growing tired in her strength was leaving her, but the dog was bounding back to her every few moments and urging her as plainly as a dog could to come on a little further.

Suddenly at the mouth of the cave, the dog stopped and growled and pulled her by the hand. Helmi followed blindly into the midnight blackness, into which the lightning could not penetrate. She found something soft beneath her feet, and, stooping down, found a bed of dry and comfortable moss.

On it she lay, grateful to be out of the lashing fury of the storm. The storm still roared in her ears, and the fury of the lightning came with a sound like a roaring cave.

(To be continued)

The Perennial Flower Border

Can Be Made to Add Beauty to Western Homes

The perennial flower border can be made to add charm to the homes in the west. The reason of 1927 reported by the superintendent of the Morden Experimental Station for herbaceous plants. A beautiful covering of snow over a straw mulch proved an effective protection and the plants came through the winter in good condition, practically no losses being sustained. In seasons of good rainfall such perennials as the Spiraea, Anemone, Phlox, and Delphinium and Paeonies thrived abundantly and bloomed profusely. The conspicuous snow-drops, Florida bluebells, and the blue and white pansies were also in good condition. The Shasta Daisy, a new introduction, did splendidly. It produces large flowers, continuing to bloom over a long period. A particularly fine effect was produced in the border by a combination of Delphinium and the old Yellow Mullen. Some effective lines such as Will-mottia, Henry, Lantana, and Begonia, produced very lovely results.

Studying Under the Fluor

Studying under the Fluor is an innovation in university teaching, introduced by J. T. Pearson, of the University of Miami, Florida. Twelve students, garbed in bathing suits and all wearing diving helmets slipped into the briny deep, took their positions comfortably on the sandy bottom and observed how Prof. Pearson gathered specimens of sea life.

The bamboo holds the record among plants for quick growth. It has been known to grow two feet in 24 hours.

Teeth and Health

Issued by The Canadian Dental Hygien Council and Published by The Saskatchewan Dental Society

TOOTH IS LONGER

Your child had tooth-ache one night and you were able to relieve his suffering by applications of oil of cloves to the cavity, and when the pain had subsided, you congratulated yourself that the trouble was cured. But in the morning he awoke to find that the tooth was still there, upon, and longer than the others, so he said.

Now, he was right; for in a sense the tooth was longer than its fellows, but what happened?

Each tooth is suspended in a soft tissue web which acts as a cushion between the tooth and its bony socket, breaking the jar when the tooth is in use.

And the inflammation which caused the tooth to ache, has spread to the pulp of this sac (or pericoronitis), which is richly supplied with blood vessels; thus, with the accompanying rush of blood, the sac has become swollen and so thickened.

Actually, then, it does lift the tooth in the socket a trifle, and it is this it is the opposing teeth before the others come together.

Now, of course, this needs attention, not only because of the danger of the abscess from the inflamed condition if allowed to progress further, but also for the reason that the tooth will do all its chewing on the well side, in his endeavor to avoid using the sore tooth.

This continued long enough, with the habit making for a one-sided muscle development and leaving the teeth on the "sick side," because of these deciduous teeth be allowed to remain in such condition as to cause pain when used, and of course naturally be bolted and a harmful habit formed which may be difficult to correct later.

Drones Does It

One of the latest mechanical devices in this mechanical age is the new switch which floods an air port with light at the sound of an approaching aeroplane. The drone of the aeroplane motor is used to start a sympathetically-tuned reed vibrator which in turn causes the light to vibrate, and the reed in turn switches on the powerful lights.

No vegetable has a higher content of vitamin "A" than spinach; weight for weight, it is a little higher than butter in this substance.

Gossip is a host of prey that devours its victims while they are alive.

Don't open headlines, or any of the papers, until you have read the first page. It is a habit that is a little higher than butter in this substance.

Horses and Tractors

There are 68 horses on each farm in Manitoba, and a tractor to every 4.6 farms in the province. Each Saskatchewan farm has 10.2 horses and there is one tractor to every 4.7 farms. In Alberta, there are 10.5 horses to each farm and one tractor to every 7.5 farms.

SUMMER COMPLAINTS

KILL TYLETTS ONES

At the first sign of illness during the hot weather give the little or baby's Own Tablets or in a few hours he may be beyond aid. The Tablets will prevent summer complaint if given occasionally to the well child, and will promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the mother has the guarantee that they are absolutely safe. They are sold by all druggists or will be mailed on request. 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont. A little booklet, "Care of the Baby in Health and Sickness," will be sent free to any mother on request.

Small Town Large Name

Lindavale, a small town in the heart of the Canadian prairie, is the name of a very small town on the island of Anguilla, off the coast of Wales. Reduced to English it means: Church of St. Mary in a whorl of white hazel near a hippopotamus and near St. Tysilio Church which is near a red cave.

Corset cannot exist when Holtey's Corset Remover is applied to them, cause it goes to the root and kills the growth.

Suitable Air Ports

Municipalities Must Consider Size Of Machine To Be Accommodated

Every municipality from coast to coast has the matter of building an airport under consideration. The completed arrangements for an airport. Letters reaching Canadian Aviation indicate that adequate provision for the expansion which will be necessary within a very short time have in many cases been neglected.

Municipal officials should be advised that a landing field suitable for instruction planes and even for weight transport machines will be totally inadequate for the accommodation of the large type of machines which will constitute the standard equipment of the large air transportation companies.

A city with landing facilities unsuitable for this type of machine cannot be included in the plans now under consideration by the transport companies. Inadequate landing facilities will not just as surely prevent a municipality from being included as a port-of-call by large transport machines as would a harbor 20 feet deep exclude ships with a 30-foot draft.

Municipal officials should co-operate with the department at Ottawa and furthermore secure the services of a competent airport engineer so that they will not only get an airport map but will find themselves in a position to state there.

Surveying With Explosives Earthquakes manufactured by engineers are being used in surveying the right-of-way of the proposed Trans-Alberta Railway. Explosives are set off under the ground and the resulting vibration accurately traced so that the character of the soil and strata may be determined. A special seismograph traces the vibrations on photographic paper with an accuracy which could not be attained by other methods.

Little Helps For This Week

"Now, therefore, keep thy sorrow to thyself, and bear with a good courage that which hath befallen thee."—Ecclesiastes 1:12.

The patient heart. That bears its heavy cross apart, that still maintains its peace, that is its burden unto Christ alone. —Ecclesiastes 1:12.

Most dear and gracious comfortings. —Mary Bradley.

It is not in vain that you are called to pass through great trials and sufferings. They never leave you what they found you; God forbid they should! But how you bear them, what they lead you to do and to feel will vary according to your own attitude. Their trend and purpose are towards those two poles of duty—God and humanity; but it is our weakness and fault that often we do not read aright their meaning.

Suffering may leave us hard, selfish, and complaining, or it may lead us into the mysteries of Providence, and into the very fellowship of God. —Theodore T. Munger.

Your Home Medicine Chest. —Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Thomas' Electric Oil. Its manifold usefulness in relieving pain and healing scratches is known by many thousands throughout the land. Always use Dr. Thomas' Electric Oil for relieving rheumatic and sciatic pains, treating sore throats and chests, coughs, burns, scalds, cuts, bruises and sprains.

Sandy: That car I bought from you won't go.

Salesman: Well, sir, you said you wanted one that wouldn't use much gasoline.

How Much Water Should Baby Get? —A Famous Authority's Rule

By Ruth Brittain

Baby specialists agree nowadays, that during the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later the rule is two ounces of fluid per pound of body weight.

Drinking milk water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of babies and children, such as colic, chloers, diarrhoea, gas on stomach and bowels, indigestion, constipation, and sleep, underweight, etc., leading physicians say there's nothing so effective as Fletcher's Castoria. The recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing popularity.

RESCUE EFFECTED OF MEMBERS OF THE ITALIA CREW

London.—Despatches received here from Virgo Bay and from Rome indicated that the members of the Italia crew, former captives of General Nobile, who have been in desperate need of help, were rescued by the Russian relief ship Krasnaya, and that three other men, apparently members of a dog sled expedition to rescue the Italia crew, have been sighted.

This news, coupled with the news from Moscow, that two Italians, Mariano and Zappi, had been rescued after 43 days of wandering on Arctic ice and the body of Dr. Malmgren had been recovered, constituted the most successful day of rescue operations since the drigible Italia crashed on May 25, after a flight over the North Pole.

Exhausted by way through a desert of broken ice cakes, the Krasnaya pushed her nose to the point far off Northeast Land where a tiny tent marked the camp of four members of the crew of the wrecked polar drigible Italia.

The starved, frantic men who had battled starvation and freezing temperatures since May 25 were taken aboard, it was announced in advices from Rome.

The second group sighted was believed to be the daring men who set out by dog sled to aid the stranded Italia crew and were believed to have believed this latter party that was commanded by Captain Sora, an explorer, who set out with two companions.

The Krasnaya sought her way to the Viglieri group in a sensational climax to the day's work. Five kilometers from the drigible Italia crew, the Russian ship at the time was passing near the exact spot where the Italia crashed on May 25, killing five of her crew, injuring two seriously, and drifting away in a stiff wind with six men aboard.

The survivors in the Viglieri group who were rescued, were believed to be Lieut. Viglieri, Italian navy navigator, Giuseppe Bili, radio operator, who had kept the group afloat with the world; Filippo Toroni, engineer; and Professor F. Debonack, meteorologist.

The group had been sending radio messages to the Krasnaya reporting their growing discouragement and it was believed the four men were in such serious condition that only speedy medical attention would save their lives.

Meeting In Regina Of Noted Barristers

Representatives Attending From England, France, Irish Free State and U.S.A.

Regina.—Preparations for the most brilliant assemblage of legal talent ever to gather are proceeding here. Next month, the 25th annual meeting of the Canadian Bar Association will be held in this city, with headquarters in the Hotel Saskatchewan.

From the Maritimes and the Pacific Coast, outstanding public men will come for the yearly conference. From France, Great Britain, the Irish Free State and the United States, representatives of other legal bodies will be present to aid and assist in the great meeting. The convention will last three days, August 29, 30 and 31. Hon. Mr. Justice W. M. Martin, President of the Canadian Bar Association, will be in the chair when the meeting opens at 10 a.m. on August 29. He was elected at last year's annual meeting, held in Toronto with

Philadelphia Man With Three Companions Reach Summit

Jasper Park Lodge, Alta.—For the first time in its history, the Mountie took the peak in Jasper National Park, named after the gallant hero of the South Pole, has been conquered. The successful climber is Dr. J. H. H. Thornton, of Philadelphia, noted mountaineer and author of "The Glimmering Mountains of Canada," and of Philadelphia, a member of both the American and the Italian Alpine Clubs; William H. H. Thornton, of New Haven, Conn., and Julian H. H. Thornton, of New Haven, Conn. The altitude of Mount is 10,826 feet.

Lord Byng's Appointment

In Government Measure To Restore Confidence In Police Force

London.—The appointment of Viscount Byng, of Vimy, as commissioner of Metropolitan police, announced by the government to have been a measure to restore confidence in the police force, was sustained in Parliament when a Labor motion of disapproval was defeated, 231 to 106.

Sir William Jowett-Hicks, the Home Secretary, in making the announcement, declared that so shaken was the public faith in the police department that he had reluctantly called upon Lord Byng because the force needed, not re-organization, but re-inspiration.

Lord Byng's appointment was based on the ground that it might tend to militate against the force. This Sir William denied.

Viscountess Astor and Miss Ellen Wilkinson, the woman Labor member, although opposing the appointment of Lord Byng's appointment found themselves in union in expressing satisfaction at the resignation of Sir William Jowett-Hicks, the re-appointing commissioner, who, they said, had tried to drive police officers from the force and whose policy where women were concerned had been reactionary.

Lord Byng's appointment was announced a few weeks after the dismissal of Lord Byng's appointment found themselves in union in expressing satisfaction at the resignation of Sir William Jowett-Hicks, the re-appointing commissioner, who, they said, had tried to drive police officers from the force and whose policy where women were concerned had been reactionary.

Cruiser Daulless Reloated

Will Be Placed In Halifax Drydock For Repairs

Halifax, N.S.—The British light cruiser "Daulless," which hung up on a pier of the Halifax harbor at the entrance to Halifax harbor on July 2, has been floated off after a week's strenuous preparation by the wrecking crew of the Halifax harbor.

The Daulless was at once towed by the harbor and tied up to the pier in Mill Cove, Dartmouth, awaiting a berth in the drydock, and will be kept aloft by the compressed air pumps which were installed on her decks a week ago and which have been kept going continuously ever since.

The Daulless will be placed in the drydock of the Halifax harbor, where, it is estimated, the repair work will keep 600 men busy for months. It had been ascertained early that the rocks had torn a 50-foot hole in the cruiser's bottom.

Thousands of persons gathered along the shore; on Citadel Hill and on harbor craft to witness the floating of the Daulless from its precarious position.

Toronto Mail Robbery

Five Men Under Arrest Charged With Complicity

Toronto.—Five men are under arrest here charged with complicity in the robbery of the Canadian National Railway mail car at the Union station in the early hours of June 20, it was announced by General D. C. Dwyer, chief of police. One woman is held on a charge of vagrancy and another as a material witness.

Although it has been generally removed for several days that some arrests had been made confirmation of the police.

Finlay McLeod, Sr., 48, of Toronto; Everett McKinnon, 28, barber of Detroit, and John Brown, alias Sullivan, 28, Toronto cigar store clerk, are charged with robbery. Finlay McLeod, Jr., 24, Toronto newspaperman, and Alex. McLeod, 42, of Toronto, son and brother respectively of Finlay McLeod, Sr., face charges of receiving stolen goods.

Will Investigate Tariff Proposals

Ottawa.—Hon. James Robt. Minister of Finance, has left Quebec for a holiday in Ireland. While there he will look into the new tariff proposals of the Irish Free State and he is expected to take up with William Costello, president of the Executive Council, the matter of extending to Ireland the provisions of the Canadian preferential tariff on Empire goods subject to reciprocal treatment for Canadian goods on the part of the Free State.

To Study Canadian Methods

London.—With the object of studying commercial undertakings and institutions in Canada, the United States, representatives of the National Chamber of Trade and Commerce, have left Southampton for Montreal. Six weeks will be spent making a tour of the two countries.

Might Be From Tropics

Unusual Exhibit Will Be Seen At Edmonton Exhibition

Edmonton.—Grapes, sorghum, sugar cane, soy beans and such a list reads like the exports of some tropical island, or at the very least, the products of a southern state.

Visitors to the Edmonton Exhibition will have the opportunity of checking up on the list, for the products mentioned will be included in the entry from the C.P.R. Irrigation Development farm at Brooks, Alberta, which will be staged in the Agricultural building.

Throughout the week fresh supplies of the products quoted will be brought to Edmonton from Brooks in order to keep the display fresh and attractive.

Successor Not Named

Manitoba Governor Has Not Filled Dr. Wallace's Position

Winnipeg.—No decision as to who will succeed Dr. R. C. Wallace, of the Manitoba University, as commissioner of mines and natural resources has been reached by the provincial government.

Dr. Wallace was recently given the post of president of the University of Alberta, and has relinquished his position as head of the geology department of the university of Manitoba, to take over his new post some time in September.

MANITOBA TO OBTAIN CONTROL OF RESOURCES

Ottawa.—The Federal Government and the government of the province of Manitoba have reached an agreement to take the basis of settlement of the question of the administration and control of the natural resources of Manitoba. Premier Mackenzie King has issued a statement covering the agreement arrived at.

Under the agreement the vexed question of financial adjustments was left to a committee which will be appointed by the Federal Government with the concurrence of the commission. The two governments have agreed on the following persons as members to comprise the committee: Hon. W. A. Targuen, of the Saskatchewan Court of Appeal; Hon. T. A. Cregar, of Winnipeg; and Charles M. Bowman, of Waterloo, Ont.

Mr. Cregar occupied the post of minister of agriculture at Ottawa for some time and was also leader of the Progressive Party. Mr. Bowman is a director of the Mutual Life Insurance Company, of Canada.

Mr. King announced that these gentlemen would be apprised immediately of the agreement and that they would be invited to accept appointment.

INDUSTRIAL CONTROVERSY

At J. Cook, secretary of the Miners' Federation in Great Britain, who is the centre of the latest industrial controversy in the old country. He latterly attacks the industrial police of the Labor movement, and in return the Miners' Federation has dismissed him while the Welsh Trades Union council has indicted him for disloyalty. He is familiarly known as "Emperer" Cook.

Price List Drafted

Six Wheat Classes In World's Grain Show Awards

Regina, Sask.—For the purpose of buying out price list for the World's Grain exhibition and conference to be held in Regina in 1932, a tentative classification has been prepared by a special committee nominated by Hon. W. R. Motherwell, Dominion minister of agriculture. The committee is composed of J. A. Mooney, of Regina; H. J. Newman, Clark Street, Dr. McLeister, and G. H. Clark, all of Ottawa.

Exclusive of special classes the tentative list makes provision for \$20,000 in prizes; six classes of wheat with \$100,000 in prizes, two classes of oats, with \$20,000 prizes, five classes of barley, with \$15,000 prizes; three classes of field peas, with \$20,000 prizes; two classes of soy beans, \$1,000; one class of dry, \$5,000; one class of flax, \$2,000; four classes of buckwheat, \$1,000; four classes of corn, \$20,000; one class of rice, \$2,000; two classes of millet, \$2,000; one class of dry clover, \$1,000; one class of alfalfa, \$1,000; one class each in sweet clover, timothy, brome grass, mangels and turnips \$500 each.

Hold Memorial Service

Brussels.—An impressive memorial service for Captain Alfred Loewenstein was held in the church of St. Michael and St. Gudule. A tall catafalque surrounded by candles had been erected in the nave of the church and the choir was draped in black. Madame Loewenstein, her son and members of the Loewenstein family were present, as well as many persons prominent in Belgian life.

Madame Loewenstein, her son and members of the Loewenstein family were present, as well as many persons prominent in Belgian life.

WEST'S NEW PLAYGROUND

Prince Albert National Park, Saskatchewan, which will be opened officially on August 10, bequeaths to the people of Western Canada one of the finest playgrounds on the continent. Its borders enclose 1,400 square miles of timber and brush, where all is to be found that goes to make a holiday memorable.

Prince Albert National Park lies about 30 miles north of the city of Prince Albert, which is served by many lines of the Canadian National Railway. A fine motor road runs from the city to Lake Waskesiu, in the heart of the park, where the opening ceremonies will be performed

by the Rt. Hon. W. L. M. King, Prime Minister of Canada. Premier King represents Prince Albert in the opening ceremonies, and the elements are presenting him with a cottage on this lake.

In addition to the Prime Minister, many other men notable in the public life of Canada, will attend. The programme will extend over a period of two days, and include housing accommodation has been arranged by the committee.

The photograph shows a view on Kegons Lake, a typical body of water in this new and beautiful playground of the nation.—Photograph by Canadian National Parks.

Marketing Surplus Wheat

Carry-Over Of 1931 Crop May Be \$8,000,000 Bushels

Port William, Ont.—A welcome revival in the movement of western grain and favorable for the coming harvest were main features of the June report of E. A. Ursell, statistician to the board of railway commissioners. A marked improvement developed toward the end of June in the marketing of the exportable surplus of Canadian wheat with the result that shipments increased substantially.

The increase in lake shipments was most welcome as providing storage space for most of the grain in transit from western ports.

Lake shipments during July are expected to be quite heavy and will make room for the stocks at present in country elevators at interior points which must be shipped out in the month of the new crop.

At the end of June there were 70,000,000 bushels of wheat in store in the western division, 8,000,000 bushels in transit to terminals, approximately 82,000,000 had been milled and used for seed and animal purposes, and 10,000,000 bushels had been shipped out of the division. Allowance for what was on hand on July 31, 1927, it would thus appear the net total of the 1927 wheat crop already accounted for is more than 429,000,000 bushels.

It looks as if the carry-over at the close of the present season will be very close to 86,000,000 bushels unless exports during the present month far exceed expectations.

The Manville Tragedy

Vernon Bocher Is Held As A Material Witness

Edmonton.—Developments in the Manville tragedy, in which four people on the Bocher farm were slain, and the death of Vernon Bocher, and the discovery that a British army rifle of 203 caliber was utilized in the home of G. E. Stevenson, honored resident of the district, and whose farm is about a mile from the Bocher residence.

Vernon Bocher, 20 years old, who found his mother, brother and two hired men lying dead around the house and the choir was draped in black, when he returned from the pasture at the sound of the shooting, he being held as a material witness.

The police investigators state that the report of young Bocher is merely routine since he was the first to reach the scene of the tragedy.

BRITAIN WILL REPLY TO U.S. ANTI-WAR NOTE

London.—The British reply to the American anti-war proposals in the House of Commons.

The secretary made this announcement in the House of Commons in reply to questions and he took the responsibility of what some of his questioners characterized as delay in answering the American note.

The only delay, however, said Chamberlain, was the time which was being taken for careful consideration of such an important matter and the Dominions had no responsibility for this.

Hecled by Col. Josiah Wedgwood, Labor, who asked if Sir Austen Chamberlain "wreck" this proposal, the foreign secretary declared:

"I do not propose to wreck the proposal. I welcome the proposal and I wish to bring it to a successful conclusion."

Park.—The Council of Ministers approved foreign minister's reply to Secretary Kellogg's proposals to outlaw war which France formally agreed to sign.

It was reiterated that the reply, while fully explaining France's viewpoint, does not put the explanations in the form of reservations.

Awarded Medal Of Merit

Ottawa.—Scoutmaster Oscar Lamm, of Port Saskatchewan, B.C., has been recommended for the medal of merit by the Boy Scout Association for his work for the Boy Scout movement in China for a period of several years.

Linburgh's Plane Catches Fire

Salt Lake City, Utah.—Col. Charles A. Lindbergh's plane caught fire on the field here, supposedly from a faulty fuel pump, and was about to take off. P. Noonan, Lindbergh's mechanic, seized a fire extinguisher and put out the flames.

PREMIER KING

Will Visit West Early In August

Ottawa.—A tentative schedule for the western trip of Premier Mackenzie King was issued from the office of the prime minister on Monday. The Premier's speaking schedule, and he will not deliver speeches at the points named. He will, however, appear in Prince Albert, his constituency, where he attends the opening of the Prince Albert National Park, and at the Prince Albert exhibition. His stay in the constituency of Prince Albert will comprise six days.

Premier King will leave Ottawa on Thursday, August 2, arriving in Winnipeg on the following day. He will leave Winnipeg on Sunday, August 5, arriving in Brandon on Monday, the sixth. Leaving Brandon on Tuesday, he will reach Dauphin the same day, August 7, and remain there until 9 p.m.

From Dauphin he proceeds to Lloydminster, arriving there at 9 in the morning of Wednesday, August 8, arriving in Brandon on Monday, the sixth. Leaving Brandon on Tuesday, he will reach Dauphin the same day, August 7, and remain there until 9 p.m.

Hinchcliffe Case

Discussed By Press

Several Outstanding Articles Have Appeared In British Press

London.—The inquiry of the state benefiting to the extent of \$2,500,000 by the "Lord Inebriate" in memory of his daughter, Hon. Miss Mackay, who lost her life in company with Captain Walter Hinchcliffe in the sinking of the Atlantic, while the family of Captain Hinchcliffe is not provided for has been the subject of several outspoken articles lately and was brought up in the House of Commons by Major P. B. Malone, Conservative.

Sir Samuel Hoare, secretary of state for air, said he understood Captain Hinchcliffe had received a widow pension and disability retirement pay in connection with his war service. Major Malone then suggested that Sir Samuel should make representations to the proper authorities that adequate provision should be made for the aviator's family.

Sir Samuel Hoare replied that as Hinchcliffe did not belong to the Royal Air Force reserve, the matter was not in the hands of the air ministry and he would advise that a decision be put to the ministry of pensions.

Offered Home In China

Jews Given Opportunity To Establish National Home

London.—An opportunity to build a Jewish national home in China to supplement the one in Palestine was offered by the minister of the Interior at Peking, says a dispatch from Peking to The London Daily Express.

The offer was made as a result of a misunderstanding by the Chinese authorities of the application of a Zionist delegate who arrived in Peking and requested permission to collect funds for Palestine.

The minister of the interior at Peking thought the Zionist wanted to build a Jewish national home in China for the purpose of settling Jews there and promised a special treaty if the Zionist would indicate the site for the proposed homeland and the approximate area required.

Credit Situation Stable

Halifax, N.S.—"The credit situation is stable throughout the whole Dominion in every line of business," declared Henry Dechen, general manager of the Canadian Credit Men's Trust Association, at their annual convention, Mr. Dechen said that last year's failures under the bankruptcy act were the lowest in eighty years and that a remarkable improvement was in process from the Atlantic to the Pacific.

Alberta's Prosperity

Alberta's prosperity is clearly reflected in a surplus of \$279,670 announced by the Provincial Treasurer, Hon. H. G. Hedges, at his annual report, \$200,000 in excess of the original estimate. The present figure is a record one of the province.

RUSSIAN ICE-BREAKER RESCUES 3 MEMBERS OF CREW OF ITALIA

Moscow, July 12.—The party of three men who started to walk from the scene of the Italia disaster was rescued today by the Russian ice-breaker Krasnia.

Dr. Finn Malmgren, Swedish scientist, was found to be dead when the Russians reached the party. Victim of bitter struggle aboard the Russian ice-breaker Krasnia, July 12.—Copyright by the Associated Press.—Given up dead for the past six weeks, two of the three members of the Italia's walking party were rescued today by the ice-breaker Krasnia.

The third, **Dr. Finn Malmgren** noted Swedish meteorologist and scientist, was found dead, the victim of the bitter struggle since May 20 against the terrors of the Arctic.

The rescued members of the party were Captain Alberto Mariano, pilot of the ill-fated Italia, and Capt. Filippo Zappi, the navigator, a member of the Italian navy.

Captains Mariano and Zappi are now aboard the Krasnia. Both were in an exhausted, half frozen and starved condition when they were snatched from what had seemed certain death for many weeks. Captain Mariano's leg was frozen, but his companion was quite well.

Dr. Malmgren died a month ago, but his two companions, faithful to their dead comrade, have kept his body and this was taken aboard the Krasnia today.

Moscow, July 13.—The Russian ice-breaker Krasnia has rescued all five survivors of the Italia who were on the ice near Foyns Island including Natale Ceccioni, motor chief of the Italia, rumors of whose death have often been denied.

The other men rescued were Lt. Viglietti, navigator and commander of the group; Prof. Beouance, Czech-Slovakian, meteorologist; G. Bongi, radio operator, and Filippo Troiani, engineer.

The ship also picked up the Swedish plane which Lt. Lundborg had wrecked in attempting the rescue of the marooned men.

May Rescue Six Others

Moscow, July 13.—Hope for the party of six men carried off in the bag of the dirigible Italia on May 25 and since given up for lost, has been revived by reports reaching here indicating that the location of the group is known.

FORMER PREMIER GIOLITTI, ITALY DIED ON TUESDAY

Cavours, Italy, July 17.—Former Premier Giovanni Giolitti died at 1:35 o'clock this morning following a long illness from uræmic poisoning.

The 55-year-old statesman took a serious turn for the worse last week and from that time hope for his recovery was virtually abandoned. Complications arose which caused a paralysis of one leg and the former premier himself realized that he could not live. He had all his faculties and told his relatives, all of whom gathered at his bedside, that he was happy at the thought of again meeting his wife who died some years ago.

Was 85 Years Old
 Cavour, Italy, July 17.—Giovanni Giolitti, deputy speaker of the old Liberal school and five times premier of Italy, died this morning at the age of 85. He had been suffering for a long time from uræmic poisoning and took a turn for the worse last week.

He retained all his faculties to the end and told his relatives, all of whom gathered at his bedside, that he was happy at the thought of again meeting his wife who died some years ago.

Sunday night, when it was seen that his condition was hopeless, he was given extreme unction and Pope Pius sent him the apostolic benediction. The former premier himself realized that he would not live and complications arose which caused the paralysis of one leg.

A little after 1:30 this morning an urgent call was sent to the doctor and the priest. When they reached Giolitti's bedside he was dying.

Giovanni Giolitti had retained his seat in the chamber of deputies until the end of his last appearance there, was made under dramatic circumstances. As the lone spokesman for the opposition, he made a futile attempt last March to prevent the passage of Premier Mussolini's measure making the Fascist party supreme by placing the final selection of candidates in his hands.

Above the noisy protests of the majority, he denounced the measure, but when it was put to a vote only he and Marcello Soleri, former minister of war and finance, voted against it.

After the kidnapping and killing of the Socialist deputy, Matteotti, Giolitti went over to the opposition. Before the advent of Fascism, Giolitti had headed the government five times and between the governments he headed the opposition. He remained in power only at the discretion of the king.

Important Notice

Whereas climatic and other conditions, over which the farmer has no control, have prevented a number of Pool members from delivering their wheat prior to date set for cut-off, July 16th, 1928, the Board of Directors, by resolution passed the 17th day of July, 1928, have authorized that any street wheat delivered at, or any carloads billed out of country houses, on or before July 31st, 1928, be settled for on a basis of the 1927-28 Pool prices.

Members delivering wheat between the dates July 16th and August 1st will receive the initial payment on the 1928-29 initial payment schedule, but an adjustment will be made by the Pool Head Office, which will bring the payment up to the 1927-28 Pool average price.
